

**IN THE CLAIMS:**

Kindly add the following new claims 17-20:

17. (new) An arm wearable communication device according to claim 1; wherein a portion of the wearable body in which the chip antenna is provided does not have a coating formed thereon that would shield reception of a signal in the vicinity of the chip antenna.

18. (new) An arm wearable communication device according to claim 1; wherein the wearable body has a coating thereon formed of a ceramic material that does not have a signal shielding characteristic.

19. (new) An arm wearable communication device according to claim 1; wherein the wearable body has a coating thereon formed of an acrylic glass.

20. (new) An arm wearable communication device according to claim 1; wherein the wearable body has a coating thereon formed of a material that does not have a signal shielding characteristic.
